Primary Actor	UC Name	Semi-automated onboarding with verification after Discovery scan		
Use Case Story Enables bulk onboarding of privileged accounts (executives, IoT, cloud) via CyberArk Discovery, reducing errors (20%) and time (70%), ensuring Zero Trust, AAA framework, and compliance with ISOZ7001/NISZ/RGP/D/DCRA. Trigger	UC#	1		
Enables bulk onboarding of privileged accounts (executives, IoT, cloud) via CyberArk Discovery, reducing errors (20%) and time (70%), ensuring Zero Trust, AAA framework, and compliance with ISOZ7001/NISZ/RGPD/DORA. Trigger	Primary Actor	PAM administrator		
Pre-Condition 1. Clear onboarding policy established, identifying privileged accounts and enforcing separation from standard accounts (IGA-managed for daily tasks). 2. Accounts registered in AD or target systems (multi-cloud: AWS/Azure/GCP, IoT devices). 3. Accounts belong to critical applications/servers. 4. Onboarding rules, platforms, and Safes configured. 5. Discovery Scan executed, results in Pending Accounts. 6. PAM Administrator performs verification process (rights, safes, platforms, Master Policy compliance). 7. Onboarding bulk initiated after verified accounts. Accounts onboarded in CyberArk Safes, enabling secure actions via PSM. Ensures Zero Trust (continuous verification, least privilege), AAA (Authentication via IDP, Authorization via Master Policy, Accounting via audits), and compliance with ISO27001/NIS2/RGPD/DORA. Reduces errors (20%) and unmanaged accounts (150 in 2024). Primary Flow (PF) Title: Semi-automated onboarding Actor Action 1) Navigate to Accounts > Pending Accounts 3) Select accounts (bulk) 4) Highlights accounts, enables Onboard 5) Click Onboard, define Safe/Platform/rotation 7) Monitor Job Monitor 8) Shows "Onboarding completed", moves accounts to Account View. Alternate Flow 1(AF1) Title: Manual onboarding of privileged accounts Trigger: Discovery unavailable. Post-Condition: Account noboarded manually, compliant with Zero Trust/AAA, ISO27001/NIS2/GDPR/DORA. Actor Action Actor Action System Response 1) Validates and onboards to Safe. Exception Flow (EF1) Title: Failed onboarding Trigger: Onboarding error (e.g., wrong platform, duplicate account). Post-Condition: Failed accounts logged/alerted, no risks from incomplete onboarding. Actor Action System Response 1) System Response	-	reducing errors (20%) and time (70%), ensuring Zero Trust, AAA framework, and compliance with		
from standard accounts (IGA-managed for daily tasks). 2. Accounts registered in AD or target systems (until-cloud: AWS/Azure/GCP, IoT devices). 3. Accounts belong to critical applications/servers. 4. Onboarding rules, platforms, and Safes configured. 5. Discovery Scan executed, results in Pending Accounts. 6. PAM Administrator performs verification process (rights, safes, platforms, Master Policy compliance). 7. Onboarding bulk initiated after verified accounts. Accounts onboarded in CyberArk Safes, enabling secure actions via PSM. Ensures Zero Trust (continuous verification, least privilege), AAA (Authentication via IDP, Authorization via Master Policy, Accounting via audits), and compliance with ISO27001/NIS2/RGPD/DORA. Reduces errors (20%) and unmanaged accounts (150 in 2024). Primary Flow (PF) Title: Semi-automated onboarding Actor Action 1) Navigate to Accounts > Pending Accounts 1) Navigate to Accounts > Pending Accounts 2) Display pending accounts from Discovery. 3) Select accounts (bulk) 5) Click Onboard, define Safe/Platform/rotation 7) Monitor Job Monitor 8) Shows "Onboarding completed", moves accounts to Account View. Alternate Flow 1(AF1) Title: Manual onboarding of privileged accounts Trigger: Discovery unavailable. Post-Condition: Account onboarded manually, compliant with Zero Trust/AAA, ISO27001/NIS2/GDPR/DORA. Actor Action 1)PAM admin navigates to Accounts > Add Account, enter details (platform, Safe), validates. Exception Flow (EF1) Title: Failed onboarding Trigger: Onboarding error (e.g., wrong platform, duplicate account). Post-Condition: Failed accounts logged/alerted, no risks from incomplete onboarding. Actor Action System Response 1) System Response	Trigger	New privileged account request from HR/IGA for executives, cloud, or IoT identities.		
3. Accounts belong to critical applications/servers. 4. Onboarding rules, platforms, and Safes configured. 5. Discovery Scan executed, results in Pending Accounts. 6. PAM Administrator performs verification process (rights, safes, platforms, Master Policy compliance). 7. Onboarding bulk initiated after verified accounts. Accounts onboarded in CyberArk Safes, enabling secure actions via PSM. Ensures Zero Trust (continuous verification, least privilege), AAA (Authentication via IDP, Authorization via Master Policy, Accounting via audits), and compliance with ISO27001/NIS2/RGPD/DORA. Reduces errors (20%) and unmanaged accounts (150 in 2024).
